Aims and Scope

Central Asian Survey is devoted to the study of the history, politics, cultures and economics of the peoples of the Central Asian region, which includes those territories and populations from western China to western Anatolia sharing a common historical, ethnic, cultural, religious and linguistic heritage. Foremost of these is Soviet Central Asia and its related Turko-Muslim territories in the Caucasus and the Middle Volga, but includes as well Eastern Turkestan (Chinese Xinjiang), Afghanistan, Iran and Turkey. The historical importance of these lands with their unique and beautiful cultures and the recent unfolding of significant political, demographic, economic and military events in the region, which have precipitated new strategic linkages and raise the spectre of important local and regional change, make Central Asian studies an area of distinct and separate interest.
